SOP-BUF-003 Preparation of Tris-Glycine-SDS Running Buffer

DEMO DATA - written for the SmartLab AI demonstration. This is not an approved laboratory procedure.

1. Composition

The 1x running buffer contains 25 mM Tris base, 192 mM glycine and 0.1% w/v sodium dodecyl sulfate (SDS).

2. Safety

SDS powder is a respiratory irritant: weigh it in a fume hood or wear a dust mask. Wear gloves and safety glasses.

3. Procedure

Dissolve the Tris base and glycine in deionised water equal to about 80% of the final volume. Add the SDS last and stir gently to avoid foaming. Do not adjust the pH; it should be about 8.3. Make up to the final volume with deionised water.

4. Storage

Store at room temperature and use within 1 month.
